Discover How Gemalto's Facial Recognition Solutions Can Benefit Your Agency

Gemalto Cogent Live Face Identification System

Visit Gemalto Cogent at IACP 2018, October 6-9 | Booth 706

Gemalto's Cogent biometric identification solutions help law enforcement agencies perform their jobs more efficiently, allowing them to focus on making the public safer.

Visit us at booth **706** for a demonstration of our **Live Face Identification System (LFIS),** a video-based facial recognition system that automatically recognizes faces in a crowd -- even in dynamic, uncontrolled environments. LFIS also has an investigative mode, where users can import footage and still images from other surveillance systems for search against the agency's criminal database and leverage the speed and accuracy of LFIS.

We will also be showcasing our Mobile Identification solutions including our Mobile ID 5 software and the BlueCheck and Credence handheld biometric capture devices.

Learn more about live face recognition

Request a meeting

Our top experts will be at IACP to discuss how our solutions can help law enforcement agencies protect and serve their communities. We'd love to share insights from our customer success stories and learn how we can help your agency too!
